[What is the rarest blood type?! | Yahoo Answers](#)

Blood transfusions in humans were risky procedures until the discovery of the major human blood groups by Karl Landsteiner, an Austrian biologist and physician, in 1900. Until that point, physicians did not understand that death sometimes followed blood transfusions, when the type of donor blood infused into the patient was incompatible with the patient's own blood. Blood groups are ...

[How would blood types and blood transfusions work in a...](#)

When it comes to blood transfusion, anyone who is Rh positive can receive blood from someone who is Rh negative, but those with negative blood types cannot receive from anyone with a positive blood type. Just as we inherit our blood type "letter" from our parents, we inherit the Rh factor from them as well.
