An acceptable kill rate is determined by the total amount of UVC energy a microorganism "sees." This is a "dosage." Dosage is a product of the intensity of UVC radiation (expressed in microwatts per square centimeter) and exposure time to that radiation. You can find the necessary dosage for most common mold spores in the following table. Mold spores are

Let's take a look at five animals that are most often used for rodent solutions—and whether or not they are your best bet. 1. Cats. Of course, the No. 1 enemy of any rodent is supposed to be the house cat. But their reputation as great rat hunters is a bit misplaced. In fact, most domesticated cats don't want much to do with mice and rats ...

A typical dash cam, even with a wide range of functions such as dual lens (front + rear) coverage, motion detection, and WiFi connectivity, requires less than half the amount of power (typically around 0.25-0.45 amps) of a standard light bulb in order to operate normally. Add to that the massive size of a car battery (compared to the tiny amount of power needed by a dashcam) and you have ...
